## **DETAILED ACTION**

This is a first office action on the merits of patent application S. N. 10/789,447.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "arranged in use" (line 7). The meaning of the expression is unclear.

Concerning claims 18-21, the addition of the word "type" extends the scope of the expression so as to render it indefinite.

Claims 22 and 23 recite the limitation "the bearing plate" in the second line. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

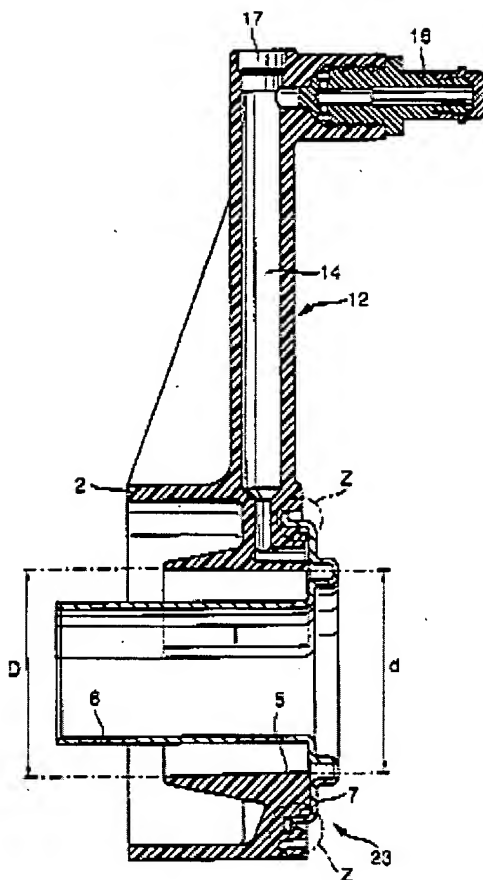

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 6, 13, 22 and 23, as understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Welter et al. ('710).

Welter et al. discloses a friction clutch comprising a drive assembly of a motor vehicle, an internal combustion engine, a transmission, a clutch release device (Fig. 1), a transmission clutch housing (4), a clutch release bearing (11), a hydraulic operating device (9), a cylinder housing (6), an operating piston (2), a bearing structure (12) fastened/fixed with respect to the engine, a substantially triangular bearing plate (Fig. 3), and connections and lines (14, 15).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 rejected under 35 U.S.C. 103(a) as being unpatentable over Welter et al. ('710).

Welter et al. discloses a molded/casted thermoplastic bearing plate. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a molded/casted metal/iron bearing plate, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

### ***Allowable Subject Matter***

Claims 4-5, 7-12, 14-17, 19-21 and 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

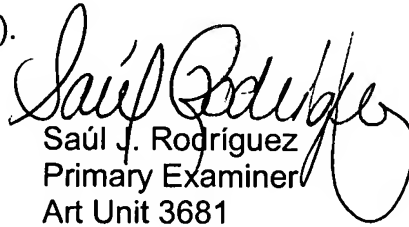

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ladin ('702), Beyer ('520, '591), Ladin et al. ('308), and Rogner et al. ('115) disclose other operating cylinder pistons formed on a separate assembly.
